EXPERIENCE

User Interface Designer & Front End Developer

EVO Payments International | *October 2013 - February 2017*

Developed and maintained multiple company-wide internal applications, as well as consumer applications. Main responsibilities include user interface design and wireframing, application flow diagrams, and front end development of user interfaces with technologies such as Angular.js, ASP.net, CSS, Sass, HTML5, and PHP using software such as the Adobe Creative Suite, including Photoshop, Illustrator, and Experience Design, as well as Microsoft Visual Studio.

Production Artist

Congoleum Corporation | *November 2012 - January 2014*

Assisted the marketing and design departments in creating templates and repeating tile-able patterns for mockup room scenes sourced from production printing files using Photoshop CS6 and AVA CAD/CAM software. Did color correction on scans of source material in order to ensure accurate color reproduction between physical object and digital image.

Creative Director

Freelance/Concept Colony LLC | *January 2009 - November 2012*

Work was performed on various freelance web design and development projects for a multitude of clients, including a hospice nursing service, a chamber singing choir, a tattoo studio, a law firm, Nautic Global Group, and a special project for the EMIS Department Head at SMU. Implemented initial design ideas in Adobe Photoshop and Illustrator, and coded all HTML and CSS. Work also included initial contact and continued communication with clients to make sure their needs and objectives were met, and that they were satisfied with work at all points during the process.

SKILLS

Expertise in the Adobe Creative Suite, including Illustrator, Photoshop, and Experience Design. Extensive experience developing in HTML, CSS, ASP.net, JavaScript, and PHP, including experience developing for WordPress, Tumblr, and various other proprietary content management systems. Familiarity with visual problem solving, wire-framing, and site mapping. Very familiar with using Microsoft Excel and other office suite products for statistical analysis and advanced mathematical problem solving.
